Government By CIA

CPYRGHT

In your editorial of Feb. 25, "Conspiracy of Silence," you end same with various questions, viz: Should spies usurp the roles of diplomats? Should they use innocents for propaganda purposes? Should they infiltrate and even dominate free institutions? And you are entitled to an answer: a loud "yes!"

The CIA, to protect our security and beat our opponents in the game of propaganda and/or our respective world images, should do all the above *plus*. They should even use mothers, Santa Claus, the Virginias of the world; they should kick, bite, kill or whatever else is necessary to protect us in the fight against any and all enemies.
